# Utilisations des pièces du « puzzle aztèque » en CE2

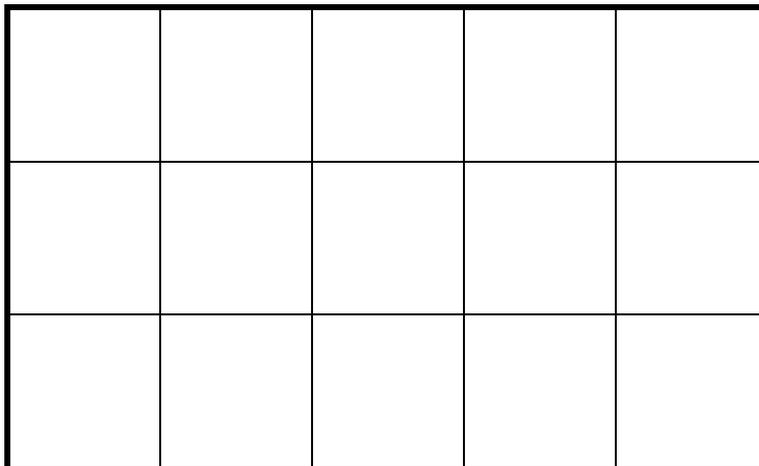

École de Sampigny  
30 mai 2022

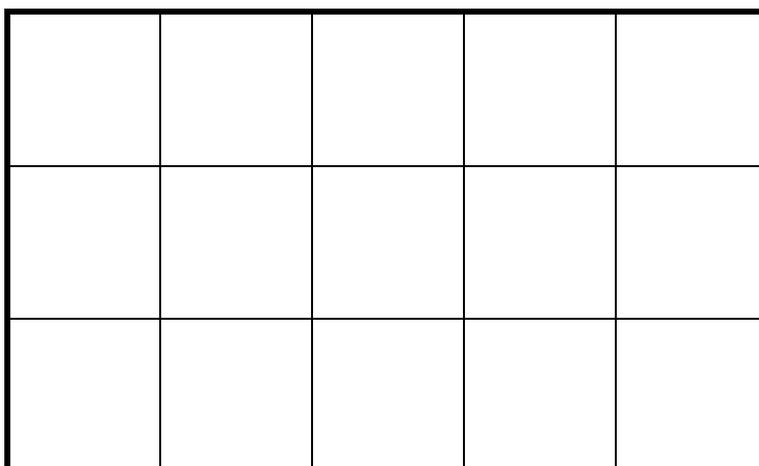

*Les carrés unitaires des pièces utilisées avaient 3 cm de côté. Les activités ont été adaptées pour des pièces de carrés unitaires 2cm.*

## Des rectangles formés de 15 carreaux

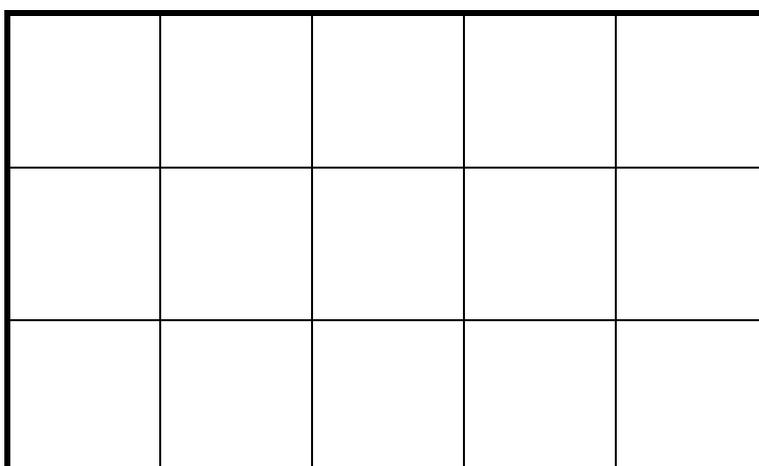

Le rectangle à recouvrir

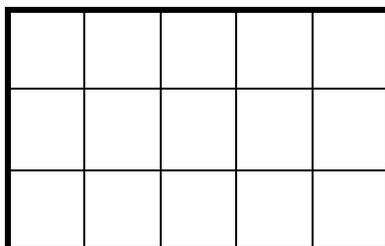

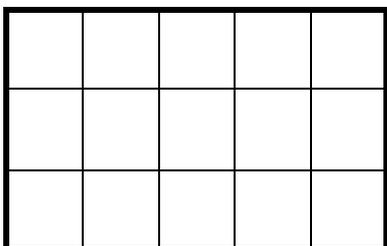

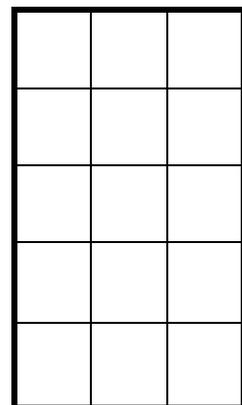

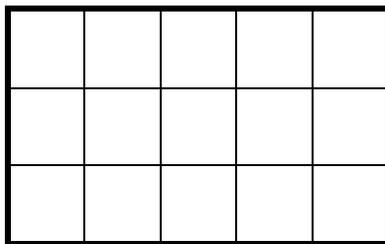

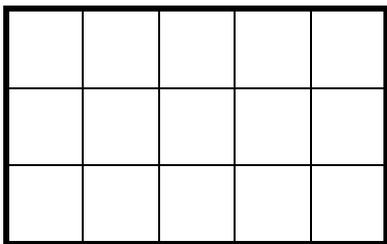

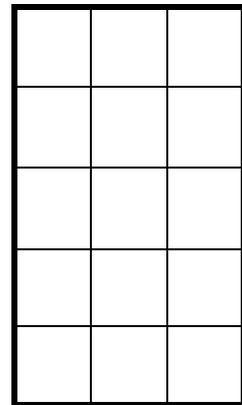

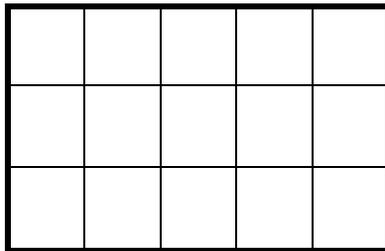

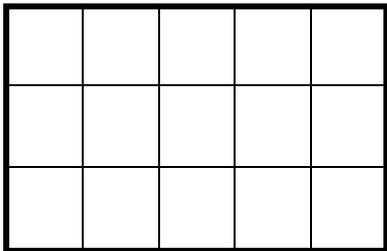

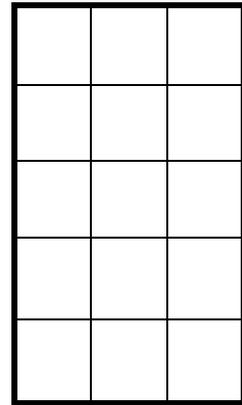

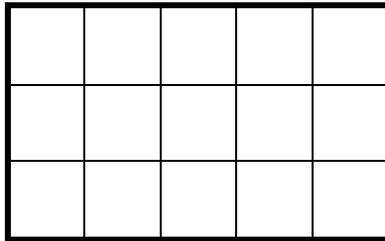

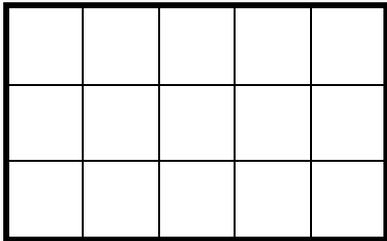

Le rectangle à recouvrir

Le rectangle à recouvrir

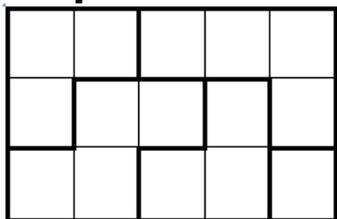

Pour les rectangles trouvés

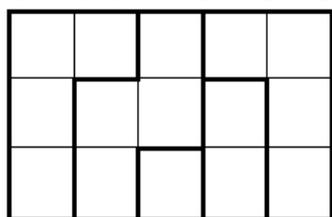

## Trois rectangles

### Un premier rectangle

Nombre de pièces utilisées	1	1	2	0	1

### Un deuxième rectangle

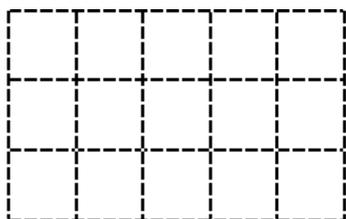

Complète le tableau.

Nombre de pièces utilisées					

### Un troisième rectangle

Retrouve le recouvrement du rectangle.

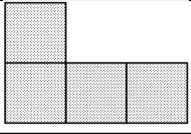

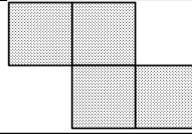

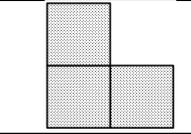

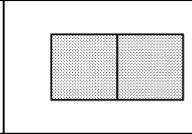

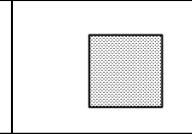

Nombre de pièces utilisées	2	1	1	0	0

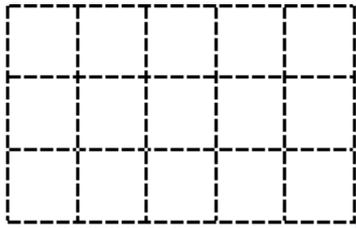

## D'autres rectangles

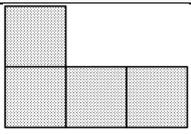

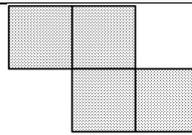

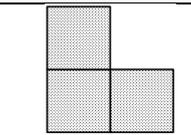

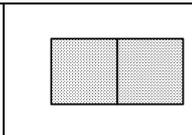

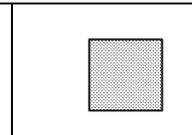

Colorie les recouvrements et complète les tableaux.

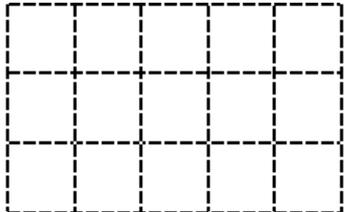

### Un quatrième rectangle

					
Nombre de pièces utilisées	2	0	1	1	2

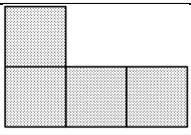

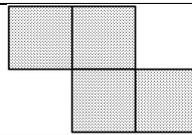

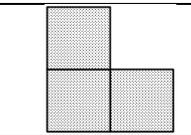

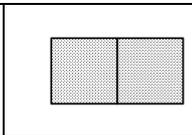

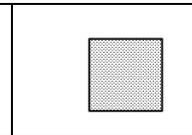

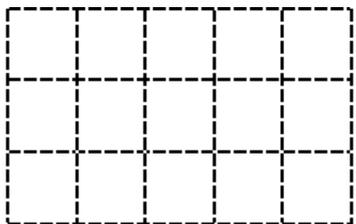

### Un cinquième rectangle

					
Nombre de pièces utilisées	2	0	2	0	1

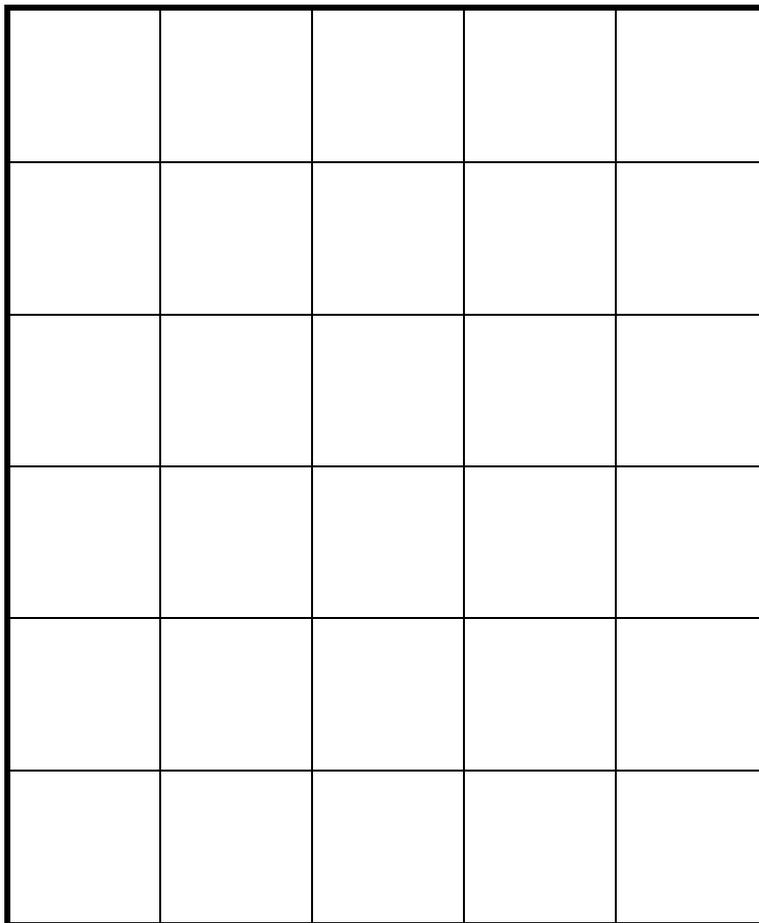

### Un sixième rectangle

					
Nombre de pièces utilisées	1	1	2	0	1

## Des rectangles formés de 15 carreaux

Le rectangle à recouvrir

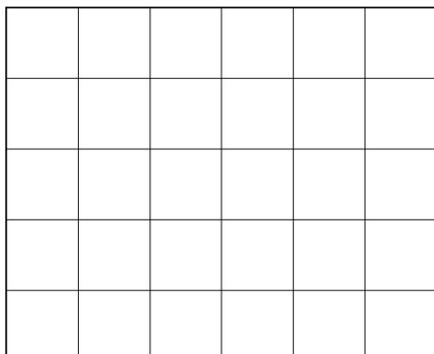

*Document élève*

## Des rectangles formés de 15 carreaux (Trois défis)

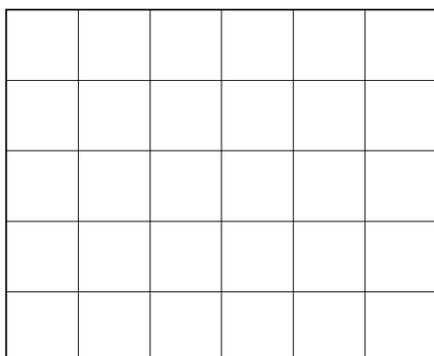

### Premier défi

Recouvre le rectangle avec les 10 pièces du jeu.

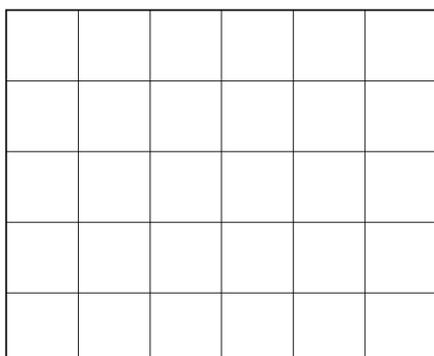

### Deuxième défi

Recouvre le rectangle avec les 10 pièces de telle sorte que deux pièces d'une même couleur ne se touchent éventuellement que par des sommets.

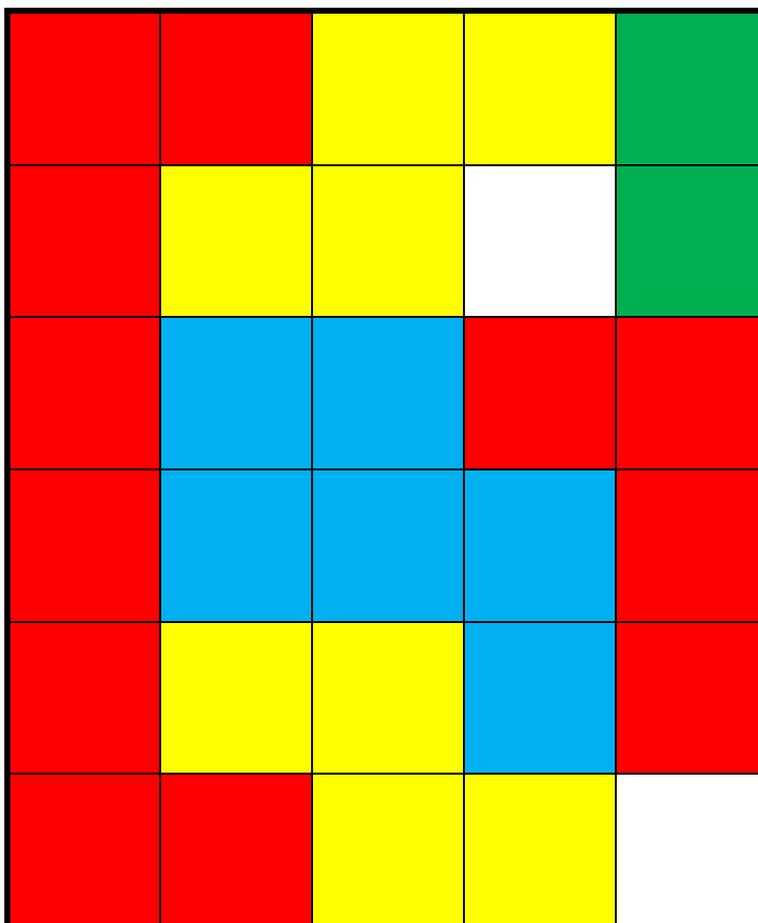

### Troisième défi

Recouvre le rectangle avec les 10 pièces de telle sorte que deux pièces d'une même couleur ne se touchent jamais.

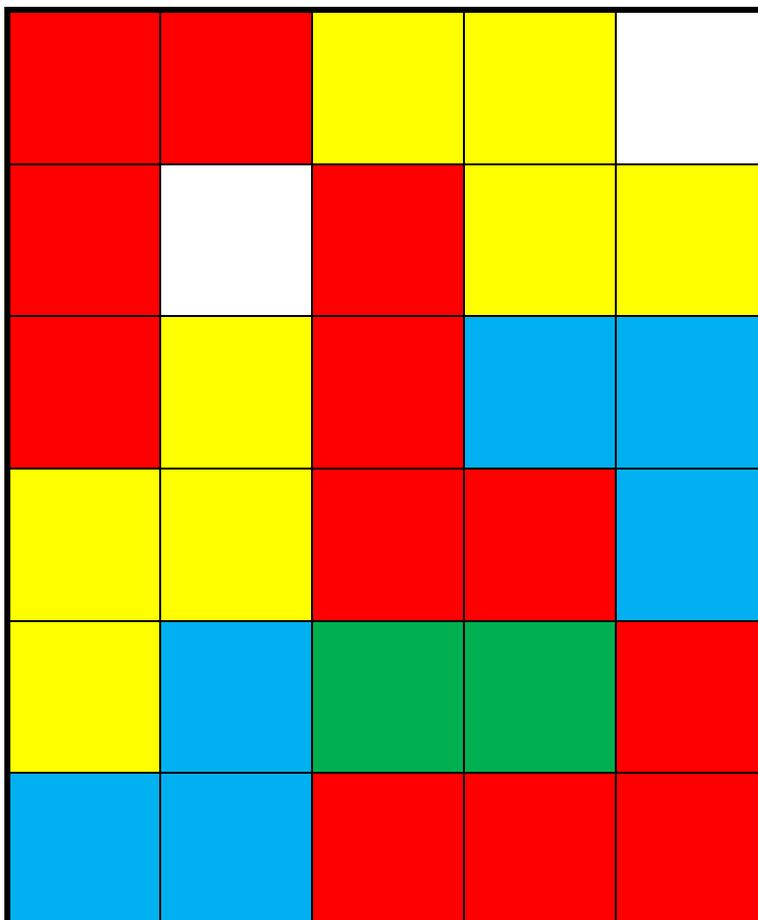

## Une solution au défi 1
